To whom it may concern:

ADR and Associates has been the Village of Ostrander's engineering consultants for the past five years. During that time we have been able to accomplish a number of projects that have resulted in considerable improvement to the existing infrastructure. With the assistance of ADR, we developed a comprehensive Capital Improvement Program and began a methodical reconstruction plan of action based on the priorities defined by that Program.

ADR walked us through the Grant Process resulting in the funding needed for each project, supervised and provided on-site monitoring of those projects. As we continue the effort through 2009 and into 2010 we anticipate funding and completion of storm sewer and road improvements to exceed \$1,000,000.00. The engineering is in place for a massive increase in our Sewer Plant capacity. Nothing to date designed by and managed by ADR has built out over budget. In fact most come in under. For a village of under 800 residents with a minimal budget, that is vital.

We would highly recommend ADR for any engineering needs and I would be more than happy to discuss any specific questions one might have regarding their capabilities. Please don't hesitate to call.

Sincerely,

Larry Crile, Mayor

---

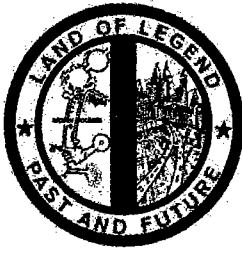

Douglas Mills, ADR Engineering

Sir,

The Village of Hanover would like to take a moment to thank you and your associates for your past 8 years of engineering consulting work that you have given the village. As I look back to 2001 and then forward, you have helped the village, accomplish a number of projects, starting with the wastewater treatment system. Your company help, to arrange and carry out the income study, attended a series of public meetings, worked on financing and grants, engineering, design, operation and kept us updated as we required. We ended up with a system and program that cost no individual a tap fee or assessment, under budget with monthly payments 25% under EPA target, which is a feat unheard of. You have helped secure grants so we could asphalt every road in the village, you have secured grants for our storm water system, work with our schools through their continuing construction programs and there are many other projects that I could list. Because of your associates and companies knowledge and professionalism the Village of Hanover is a much cleaner and healthier place to live. Again thank you and if you ever need a recommendation feel free to use my name and number. May the grass grow greener for us all.

Thank you

Duane H. Flowers Mayor

To Whom It May Concern:

I have worked with ADR & Associates (ADR) on several stormwater projects. Most recently I worked with ADR on the Garfield and McKinley, Market and Canal, and Edgewood stormwater engineering projects here in Newark.

I have been impressed by ADR's ability to overcome any difficulties and "get the job done." The versatility of this firm was recently revealed when the Garfield and McKinley project was stalled due to a railroad right of way issue. ADR's experience with ODOT and the Railroad Commission led to quick resolution that allows the construction to occur within the current construction season.

The Market and Canal, and Edgewood stormwater engineering projects have been completed on time and within budget. The engineers' cost estimates ADR prepared for the projects have been highly accurate.

Another great example of ADR's capabilities includes assisting the City of Newark with Phase II National Pollution Discharge Elimination System permit compliance. ADR has never hesitated sharing knowledge or alerting Newark to outreach opportunities.

ADR has experience, ingenuity, and creative employees that deliver excellent service in engineering and compliance services. If you have any questions, please call me at 740-670-7762.

Sincerely,

John Trujillo

Dear Mr. Carr:

As requested, this letter summarizes the positive experience that the Knox County Health Department has had thus far with your firm regarding the installation of community sewage systems in our county. ADR & Associates has been instrumental in working with various political entities to assist, inform and educate our government officials and citizens about our projects. Your company's participation at community meetings has been instrumental in moving these projects forward.

ADR & Associates has been very effective and diligent in pursuing funding sources and determining the most practical and economical options to suit the needs of our communities. I strongly recommend your firm to other county health departments to help address a need that we all face—providing sewage treatment for small, dense communities of older homes that exist far outside the reach of existing sanitary sewer systems.

For anyone reading this letter, I would be happy to discuss its contents with you.

Sincerely,

Brian Benick, R.S., M.P.H.

**Re: Letter of Support**

Delaware County has worked with ADR on several Village of Ostrander CDBG Formula Grants. I have found that ADR to be professional and precise. ADR has completed projects on time and on budget.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

*Dottie Brown*

To Whom It May Concern:

I have work with ADR & Associates on several Community Development Block Grant (CDBG) funded projects. Most recently I worked with ADR & Associates on the Village of Hanover Sanitary Sewer Collection System and Treatment Plant Project that was funded with the CDBG Water and Sewer Grant along with several other funding sources. ADR coordinated the funding applications for the \$4.9 million dollar project, while I administered the CDBG grant. ADR coordinated the bidding and contract process following the CDBG guidelines as well as those of the other funding sources. The project was completed on time in order to allow for new school buildings to open at the beginning of the school.

ADR also assisted with the preparation of the sewer ordinances and installation guidelines that were used during the residential connection portion of the project that was funded by the CDBG Water and Sewer Grant. At the end of the project a monitoring was conducted by Tim Leasure, Ohio Department of Development, which went very well.

I have also been working with ADR to develop other CDBG projects for the Village of Hanover. The first project was selected for funding and is in the process of being engineered. This second phase involved ADR doing both the project design and qualifying a second phase by conducting an income survey.

I feel that ADR has both the experience with CDBG projects and the understanding of CDBG regulations to provide an excellent service to you.

Susan Spiker  
Grants Coordinator

I wish to recommend ADR and Associates, LTD as an excellent engineer firm for your consideration. ADR has been contracted by the Granville Exempted Village School District for several major projects. This includes the site work for the Granville Intermediate School, the Granville High School Soccer Stadium and the Granville School System paving project. With each project ADR has been extremely effective in providing service to the Granville Schools. Their careful planning and knowledge of the project reflected the success of each project. Mr. Russell Krock, president, takes a "hands-on" approach working with the school system. His attention to detail and effective communication skills provides the district the assistance and direction desired.

ADR and Associates has been a valuable partner with the Granville School District. We look forward to working with ADR and Associates on future projects.

Mr. Ryan Badger  
ADR & Associates, LTD  
Newark Office  
88 West Church Street  
Newark OH 43055

Dear Ryan:

I just wanted to express my appreciation to you and the rest of the ADR team for your expertise and guidance leading to the completion of the Seven North Commerce Park project. This was the Southeastern Ohio Port Authority's first major capital project, and we could not afford to fail. With ADR's help, we have been successful.

I think we achieved a highly functional design. The project was completed within budget, and construction went smoothly. With ADR's construction management services, we were able to avoid several costly and unjustified change orders. As a relatively small client, I appreciate that our project received the level of attention it needed. ADR staff was always responsive.

I would certainly recommend ADR & Associates to my counterparts.

Sincerely,

Mike Jacoby  
Executive Director

May 12, 2009

To Whom It May Concern:

We have had the pleasure of having ADR & Associates, LTD for our engineering services for our Great Miami Bikeway Phase 2 project. This was a 2 mile bikeway project funded by the Miami Valley Regional Planning Commission and let by ODOT.

On this project, ADR had to do the preliminary engineering, environmental phase I and II, final plans, and cost estimates. They have done an outstanding job on this project for us. Ryan Badger has communicated very well with us, keeping us informed of the status of things and any issues that arose.

There were numerous issues that came up during the project that they needed to respond to ODOT about and they always did it in a timely fashion without delaying the project. This is a very important trait that we look for in a contractor. We don't want them to be the cause of delaying a project. There are things that happen to back things up, but the contractor doing their work in a timely fashion always helps the project go smoother. ADR has done that for us on this project.

We would have no issues with hiring them again to do a future bikeway project for us.

Sincerely,

J. Scott Myers  
Deputy Director
